WORK EXPERIENCE

SENIOR SOFTWARE ENGINEER - FRONTEND

Paytm Payments Bank (July 2022 - Present) Noida, IN

- Developed a scaffold application leveraging Paytm design system for intuitive **drag-and-drop UI component integration**, significantly speeding up design and development workflows.
- Created a Paytm wallet project from scratch, ensuring consistency and scalability by sourcing generic components from a common sub-repository.
- Implemented an automated UI testing setup with Playwright for **enhanced efficiency and cross-browser reliability**.
- Enhanced the bank app's localization by streamlining duplicate keys and implementing **caching to minimize network calls**.

SOFTWARE ENGINEER - FRONTEND

Greenlight Planet (Jun 2020 - Jun 2022) Gurgaon, IN

- Engineered an advanced inventory management system to track stock movement and provide performance insights.
- Launched Sunking Link, an app for device management with **real-time activation, usage, and performance tracking**, using long polling for instant updates for 1 million devices.
- Developed an App-shell using Webpack 5 module federation, unifying web app modules for smooth updates and improved performance
- Developed APIs** and contributed to **database design** for an inventory management system, enhancing backend functionality.
- Played a pivotal role in product design discussions, addressing challenges and crafting innovative solutions.

FRONTEND DEVELOPER

MyAdvo (May 2019 - Apr 2020) Gurgaon, IN

- Engineered a dynamic React JS web app, catapulting visitor numbers from **65k to 2.5 lakh in a year**, leveraging Webpack for superior performance.
- Led frontend development of a litigation management platform, enhancing case management for **150+ business clients**.
- Created a Document Management System for streamlined storage and management of legal documents.
- Built a custom, **easy-to-use Rich-text Editor** for React using draft.js, featuring multiple file attachments.
- Implemented an HTML5 Drag and Drop API for bulk document uploads, enhancing user efficiency.
